

UPDATE April 17:

Number of confirmed coronavirus cases in Lithuania: 1149

Deaths: 32

Recovered: 210

Number of tests performed yesterday: 4 564

A total of samples tested in relation to the suspected coronavirus to date: 53 101

A total of 205 medical workers in Lithuania have tested positive for the coronavirus so far and 34 of them have recovered. More than 1,200 medical workers have had to self-isolate.

Around a third of all protective medical gear ordered from China has already reached Lithuania. According to the country's Health Ministry, the shipments so far included 7.64 million pairs of disposable gloves and 3.65 million medical facemasks.

The virtual conversation robot is starting activities on the Government's website www.koronastop.lt, which provides the most relevant information on the new coronavirus spread in Lithuania.

The ViLTè solution was worked out during the Hack the Crisis hackathon, co-organised by a GovTech team from the Agency for Science, Innovation and Technology (MITA); it was evaluated by the commission as one of the best hackathon solutions. The technical implementation of this idea was carried out by the Information Society Development Committee in cooperation with the team of creators of the ViLTè robot.
